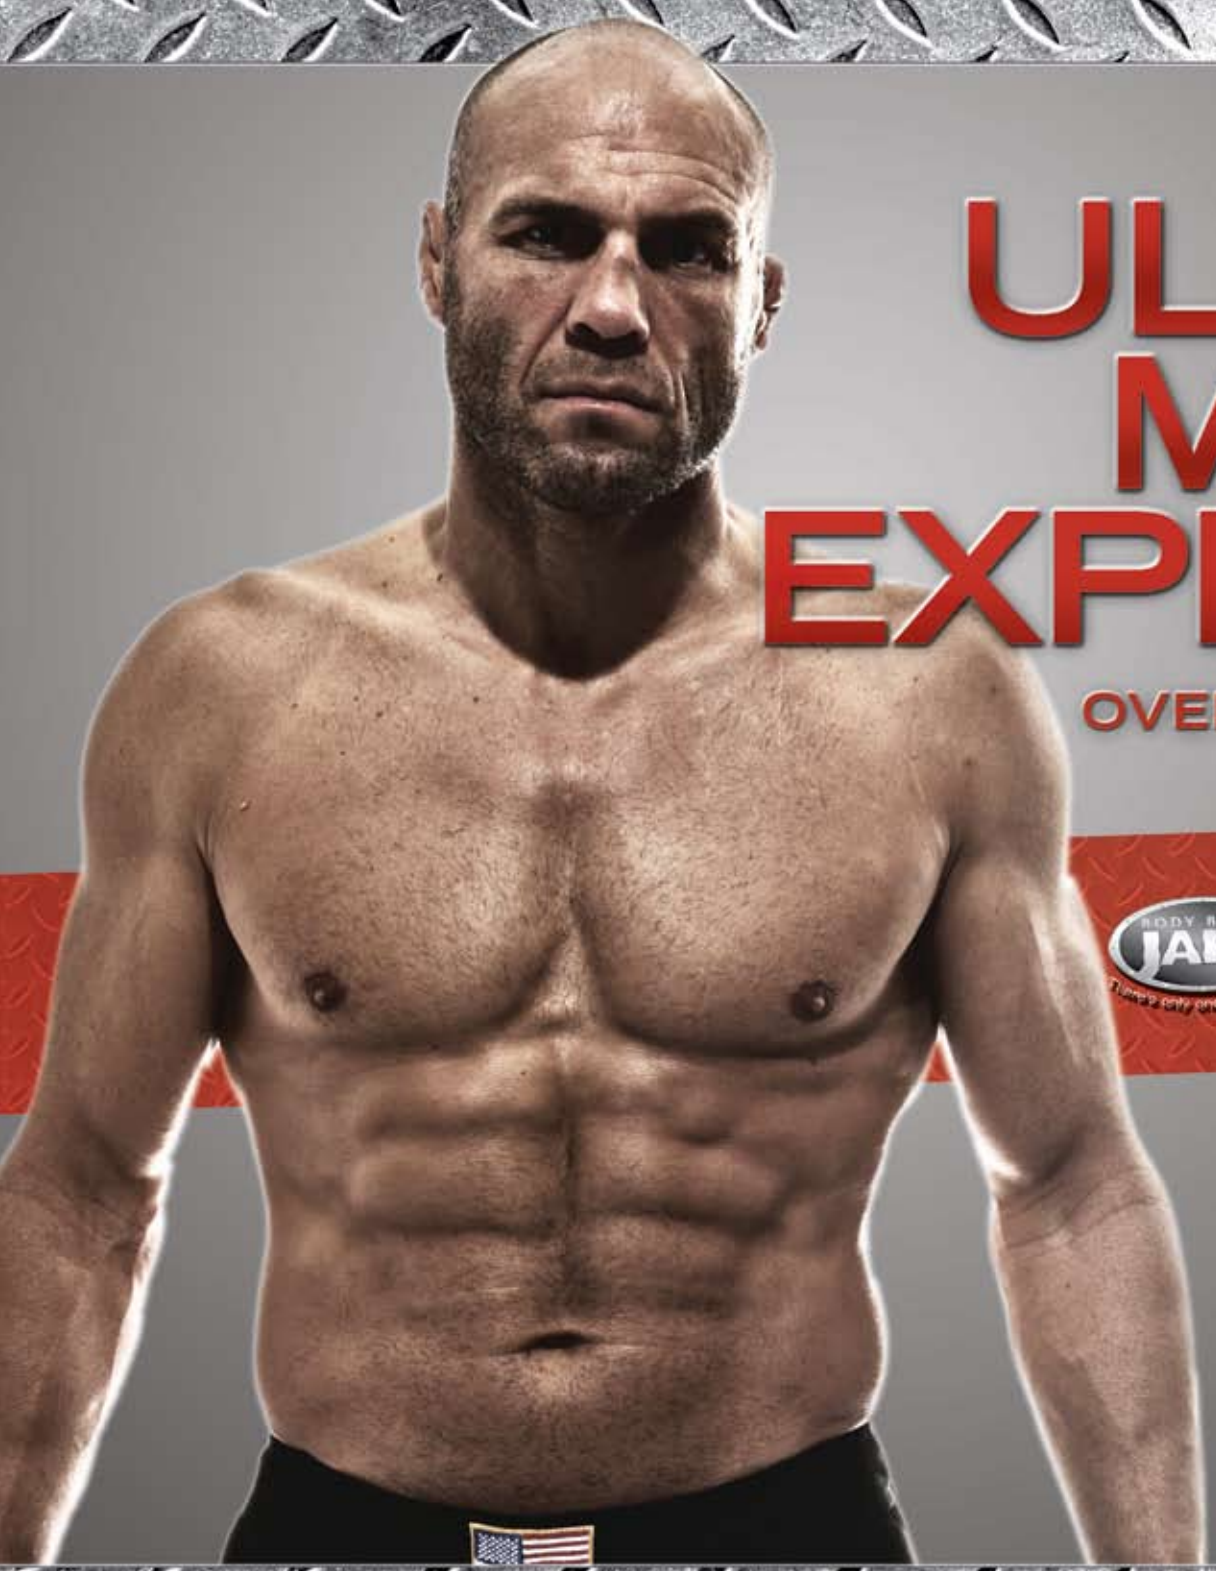
## OVER 200 KILLER EXERCISES



BODY BY JAKE

TOWER 200™

"WHAT ARE YOU WAITING FOR?"

— RANDY COUTURE
5-TIME MMA CHAMPION

GET-STARTED GUIDE ▶

**30-DAY MONEY BACK GUARANTEE**

Tower 200 comes with a risk-free 30-day Money Back Guarantee. If you're not completely satisfied with the product, simply return all of the components within 30 days of the original purchase date and we will refund you the purchase price (minus shipping & handling). For questions or to contact Customer Service, please refer to your original receipt or visit our website: www.BodyByJake.com.

**LIMITED LIFETIME WARRANTY**

Tower 200 is warranted to be free from defects in material and workmanship. Tower 200 will repair or replace, at its own option, any product deemed to be defective in accordance with the terms and conditions listed below.

The warranty shall apply to defects or faults in the frame construction of the Product which are notified to Body by Jake. This warranty does not apply in the following cases: a) when repairs of the Product have not been authorized by or on behalf of Body by Jake; (b) when the Product is a model which has been used for store displays or is a unit not covered by an original warranty i.e. used or sold "as is"; (c) when the Product is incorrectly set up, adjusted or used; (d) if the Product is used for commercial or rental purposes; (e) normal wear and tear of the Product; (f) damage caused to the Product by incorrect adjustment or use; (g) damage to a Product caused by or attributable to freight damage, abuse, misuse, improper or abnormal usage, or repairs not provided by a service center authorized by Body by Jake; (h) damage to personal property; (i) damage to non-frame parts including but not limited to power cords, pulley assemblies, hand grips, ankle straps, straight bar, and/or strapping.

This warranty covers only the original owner and is not transferable. Keep your original proof of purchase as a receipt. You may be liable to pay freight charges if applicable. Should the Product need warranty service please return it to Body by Jake or the distributor or retailer you purchased it from. All parts or Products which have been replaced due to defects during the warranty period shall become the property of Body by Jake. No other warranty beyond that specifically set forth above is authorized by Body by Jake. For questions or to contact Customer Service, please refer to your original receipt or visit our website: www.BodyByJake.com

**WARNING**

To reduce the risk of injury, read the following important precautions, instructions, and information prior to using the Tower 200. Before beginning any exercise or weight loss program, consult your physician. This is especially important for persons over the age of 35 or persons with pre-existing health problems. Body by Jake assumes no responsibility for personal injury or property damage sustained by or through the use of this product.

1. It is the responsibility of the owner to ensure that all users of the Tower 200 are adequately informed of all warnings and precautions.
2. Make sure that the Tower 200 is properly assembled and attached prior to use.
3. Use the Tower 200 only as described.
4. **Securely close the door that the Tower 200 is assembled on prior to performing any exercises.**
5. Perform all Tower 200 workouts on a level surface.
6. Do not use the Tower 200 in close proximity to other persons or obstructions.
7. **While exercising, lock the door and/or make sure other persons cannot open the door while the Tower 200 is in use.**
8. Protect yourself and others from risk of serious injury.
9. During use, the pulley assemblies may be warm to the touch. Use caution.
10. Stop if you feel faint, dizzy or short of breath.
11. Do not leave the Tower 200 power cords in the sun or exposed to outside weather conditions for any extended period.
12. Inspect regularly and properly maintain the Tower 200 components.
13. The Tower 200 is not intended for persons under the age of 18 years.
14. This product contains natural rubber latex which may cause allergic reactions.

**SAVE THIS INSTRUCTION GUIDE**

## — CAUTION —

For your safety always use caution when placing the Tower 200 on the door or removing it from the door and follow all usage warnings.

To avoid injury you should place your hands on both sides of the Tower 200 frame when attaching or removing it from the door as pictured below:

**WHEN PLACING ON THE DOOR:**

Grasp the sides of the top frame and place on top of the door [Figure 1]

Grasp the sides of the bottom frame and slide onto the bottom of the door [figure 2]

**WHEN REMOVING FROM THE DOOR:**

Disconnect center nylon strap

Remove the bottom of the Tower 200 first by sliding it off the bottom of the door [Figure 2]

Then remove the top frame from the door—make sure you grasp the sides of the top square metal frame as pictured above [Figure 1].

**WHEN USING THE TOWER 200:**

Securely close the door that the Tower 200 is attached to prior to performing any exercises.

While exercising, lock the door and/or make sure other persons cannot open the door while the Tower 200 is in use.

## TOWER 200 CONTENTS

Everything you need to get bigger, harder, and stronger is included with your Tower 200. **Before discarding the box, make sure you have removed all of the components shown below:**

- Tower 200 with up to 200 lbs. Resistance
- Tower 200 Hand Grips
- Tower 200 Ankle Straps
- Ultimate Muscle Explosion Starter Guide
- 11-Minute Mother of All Workouts DVD (PLUS Bonus Power Packs!)
- 2-Panel Tower 200 Exercise Chart

**I'M REALLY PSYCHED ABOUT THE MIND-BLOWING RESULTS YOU'RE GOING TO GET WITH THE TOWER 200. I'M TALKING MUSCLE-BUILDING PURE POWER IN JUST 11 MINUTES. SO WHAT ARE YOU WAITING FOR? START GETTING BIGGER, HARDER, STRONGER TODAY!** — STEVE MARESCA, BODY BY JAKE TRAINER

## SETUP

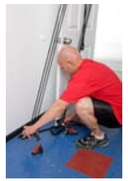
Getting started with the Tower 200 is simple because the frame and power cords come preassembled. Set up is easiest with two people, but isn't required. Once you've unpacked all of the parts from the box, **place the parts on the floor and follow these steps:**

Undo twist ties from the straps and cords. Make note of the top and bottom of the frame. The top of the frame is labeled "top" and the bottom of the frame is labeled "bottom".

Lay the unit on the floor separating the top and bottom of the frame so that the cords are untangled and fully extended. You will need about 6 feet of floor space. The plastic caps at end of cords should make contact with the pulleys.

On the top frame, grasp the pulley and tilt the pulley assembly back, releasing the tab from inside the slot. Slide the pulley assembly to the lowest settings making sure the tab is inserted into a slot. Do this for the other pulley assembly. This will give you additional slack in the power cords so you can attach the bottom frame to the door.

Grasp the sides of the top frame and lift it towards the top of the door. Place the brackets over the top of the door so that both brackets are in place. A step ladder may be needed.



Slide the brackets on the bottom frame under the bottom of the door by aligning the leading bracket with the bottom edge of the door. As you slide the bracket towards the center of the door, make sure the trailing bracket is also aligned and follows in place.

Once the Tower 200 is on the door, slide both the top and bottom brackets toward the center of the door. Securely close the door, then slide the pulley assemblies higher on the frame until the power cords are tightly drawn. Make sure the tabs on the pulley assemblies are inserted into slots.

To further stabilize the Tower 200, connect and firmly tighten the black strap between the top and bottom of the frame. (Note: If the Tower 200 frame pulls away from the door while you exercise, slide the pulley assemblies higher.)

The hooks below each pulley assembly can be used to hang your Tower 200 exercise chart.

Attach the hand grips and/or ankle straps to the power cords. See next page for resistance levels.

## CHANGING POWER CORDS

To change out an existing power cord, you will need a 6mm Allen wrench and a 13mm flat open-end wrench.

**Start by removing the Tower 200 from the door.** It is easier to do this with two people but not required.

- While the door is closed, grasp the upper pulleys and tilt the pulley assemblies back until the tabs are lifted out of their slots.
- Slide the assemblies to the lowest position on the frame and lock the tabs in place. This will provide more slack in the power cords.
- Disconnect the center strap and open the door.
- Slide the lower brackets off the bottom of the door, being careful that the top brackets do not slide off.
- Grasp the sides of the top frame and lift the unit off the door. A step ladder may be needed.
- ***Caution:* During use, the pulley assemblies may be warm to the touch. Use caution. Be careful not to allow the top frame to fall back onto you while you are removing the Tower 200 from the door.**

**Next, change out the power cord:**

- Identify the power cord that you want to change and remove the bolts from the pulleys. To do this, hold the bottom nut in place with an open-end wrench. Then use the Allen wrench to unscrew the bolt at the top of the pulley, turning it counterclockwise.
- Remove the nut and pull out the bolt. Once the bolt is removed, you can slide the pulley out of its housing. Do this for both ends of the power cord.
- Insert the new power cord by sliding one end of the pulley into the empty housing on the top of the frame. Insert the bolt and nut previously removed to tighten the pulley in place. Make sure the bolt is tightened all the way, but do not overtighten. Repeat this for the opposite end of the pulley.

With the Tower 200, there are hundreds of exercises you can do to get strong and ripped. Work one power cord at a time or multiple power cords all at once for maximum muscle-exploding resistance.

**GRAY-CAPPED POWER CORD = 25 LBS. OF RESISTANCE**
**BLACK-CAPPED POWER CORD = 35 LBS. OF RESISTANCE**
**RED-CAPPED POWER CORD = 40 LBS. OF RESISTANCE**

You can also turn up your intensity, range of motion, and muscle engagement by changing your stance or hand positions. ***Recommended variations of exercises are noted below the image.*** Inset pictures demonstrate starting position for selected exercises.

| | | |
|---|---|---|
| STANCES | CLOSE | feet slightly less than shoulder width |
| | REGULAR | feet shoulder-width apart |
| | WIDE | feet slightly greater than shoulder width |
| | STAGGERED | one foot in front of the other |
| GRIPS | CLOSE | hands shoulder-width apart |
| | WIDE | hands greater than shoulder-width apart |
